

## Software Development

### Company Overview

C Squared Systems, LLC (C<sup>2</sup> Systems) provides RF engineering, consulting, and software development services. Established in 1999, C<sup>2</sup> Systems specializes in providing services for seamless wireless coverage, from in-building maintenance and monitoring to RF analysis as well as design and implementation of DAS systems and Wi-Fi networks.

C<sup>2</sup> Systems was founded with a vision to provide complete RF services to wireless providers by assisting them with the development and expansion of their networks. Since being incorporated, C<sup>2</sup> Systems' solutions have expanded to include in-building wireless, Wi-Fi networks, remote monitoring and maintenance, wireless consulting, and software development.

With offices in Auburn, NH; Beltsville, MD; Syracuse, NY; and Lyndhurst, NJ, our experience, technical expertise, and diverse projects in the telecommunications industry have allowed C<sup>2</sup> Systems to continually evolve as new technologies are developed and the demands of our customers change.

### Software Development Expertise

C<sup>2</sup> Systems provides custom software applications in conjunction with, and in support of, our wireless offerings. Our commercial and custom software creates efficiencies in processes while providing visibility into your network environment.

Utilizing an agile software development methodology, our software solutions afford the ability to keep pace with rapidly expanding and evolving network technologies. This practice allows for faster delivery of high quality software.

### Technology

Programming languages come in many sizes and shapes with no one language being best suited for all problems. At C Squared Systems, we have experience with most modern third generation programming languages and can select the one language(s) that best fits the needs of the project.

Only with this diversity can we respond to and create the highest quality software to satisfy the requirements and needs of these high technology industries.

### Primary Languages:

- C#
- PHP
- SQL
- Action Script
- HTML5

### The C<sup>2</sup> Difference

- **Commitment to Customer Service:** C<sup>2</sup> Systems takes pride in providing the best service for our customers. Our personnel ensures we are always available for customer's needs.
- **Experience and Knowledge:** A respected industry leader, C<sup>2</sup> Systems is recognized for its years of experience and knowledge gained through developing, monitoring and maintaining software systems. Customers rely on C<sup>2</sup> Systems for projects at high visibility venues. When challenges and problems arise, our superior understanding of the technology is why customers call C<sup>2</sup> Systems.
- **Commitment to Excellence:** C<sup>2</sup> Systems is committed to performing the highest quality work. Our mission is to leverage our in-house expertise with state-of-the-art analysis tools to provide solutions that exceed project scope and client expectations.
